PROFESSIONAL SUMMARY

Web Developer | Graphic Designer | AI Automation

Focused on creating responsive websites, clean designs, and smart solutions with AI automation. Skilled in combining technology and creativity to deliver projects that are user-friendly, visually clear, and impactful.

TECHNICAL SKILLS

- Frontend: React 19, Vite, TypeScript, Tailwind CSS, HTML5, CSS3.
- Backend/Tools: Firebase (Firestore, Auth), Paystack API, Git/GitHub, Vercel.
- Design/SEO: UI/UX Design (Figma), Adobe Creative Suite, SEO Optimization.

PROFESSIONAL EXPERIENCE

Freelance Web Developer | 2023 – Present

- Architected a full-stack E-commerce platform (Nafi's Apparel) with dynamic catalogs and secure checkout.
- Integrated Cloud Fire store for real-time inventory management, improving data synchronization.
- Deployed robust authentication systems (OAuth/Email) to secure user data across platforms.

University of Cape Coast – IT Project Lead | 2023 – Present

- Engineered modular academic resource tools and exam preparation platforms utilized by student cohorts.
- Managed collaborative Git repositories, ensuring high standards for clean commits and documentation.

SELECTED PROJECTS

- Nafi's Apparel (E-Commerce): Full-stack retail solution featuring Pay stack integration and real-time updates.
- RMR Agency Portfolio: High-fidelity site built with React and TypeScript, featuring glass morphism UI.

EDUCATION & ACHIEVEMENTS

- B.S. in Information Technology, University of Cape Coast (Expected 2027).
- Delivered 5+ high-impact projects ranging from academic tools to commercial freelance sites.
- Recognized for excellence in UI/UX design and producing modular documentation adopted by faculty.
